6/29 (Sun. 10:00-17:00)	7/13 (Sun. 10:00-17:00)	

Note: Online work equivalent to 6 hours will be provided.

### Course Description

The content of this course focuses on instructed second language acquisition, a field that looks at different ways of deliberately attempting to influence the course of language learning and their impact on the acquisition of language knowledge (grammar, vocabulary, pronunciation, and pragmatics). The course will consider ways to influence language input and processing along with considering ways in which the learning environment may be altered to affect learning. Students will be introduced to theories of language learning that are relevant to classroom teaching and will discuss how these relate to their experiences as learners and teachers. Finally, students will also receive instruction in how to read academic articles, summarize them, and integrate them in a literature review relating to an area of instructed second language acquisition through the LEAPS video series..

### Key Course Outcomes

Through participation in this course and the completion of course assignments, students will:

1. Become familiar with theories of second language acquisition that are relevant to classroom language teaching **(DP#2,3,5)**
2. Become aware of instructional practices that can influence classroom language positively **(DP#2,3,5)**
3. Be able to discuss their own learning and teaching processes in relation to the material presented in the class and draw conclusions about effective teaching in their context **(DP#4,7,10)**
4. Gain familiarity with the reading and writing processes that can support the writing of a literature review on a topic related to instructed second language acquisition **(DP#10)**

Note. DP is an abbreviation of Diploma Policy statements. TESOL Program statements (objectives) can be found [here](#). Numbers correspond to the statement(s) emphasized in each course outcome.
